

**NAME**

Test::Harness::Iterator - Internal Test::Harness Iterator

**SYNOPSIS**

```
use Test::Harness::Iterator;
my $it = Test::Harness::Iterator->new(\*TEST);
my $it = Test::Harness::Iterator->new(\@array);

my $line = $it->next;
```

**DESCRIPTION****FOR INTERNAL USE ONLY!**

This is a simple iterator wrapper for arrays and filehandles.

**new()**

Create an iterator.

**next()**

Iterate through it, of course.
